

Notification System Design

Channel

Requirements

- 1) Deliver notification to user whosoever is subscribing the topic.

Capacity Estimate

- * 1 billion topic
- * 1000 notification / (topic * Day)
- * 1000 byte / noti.

→ So storage → 100 TB per day, 30 petabyte / year

Problems

Importance

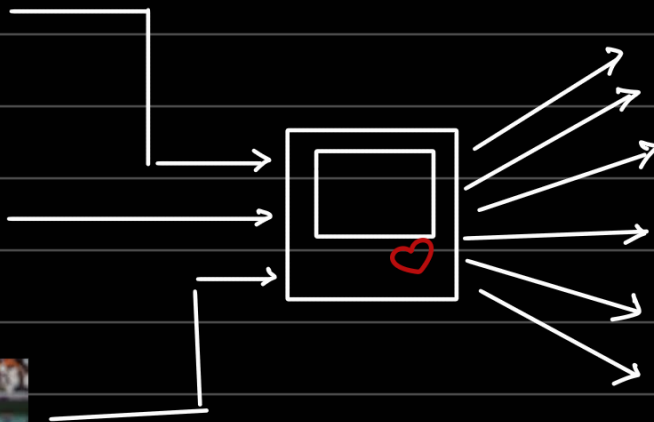

→ high priority → [one-to-one]

→ low priority → [Bulk]

Celebrity Problem

★ → all the subscribers will get email/notification?

☆ → Digest summary notification

Vendor Rate Limiting

Email → 100 email/sec
SMS → 1000 message/sec
Push → 1000 push/sec

④ if user are offline can fetch their notification later
